Lessons are divided into four categories - Beginner, Intermediate, Advanced and Immigration Interview - and are based upon your level of experience and the complexity of the material presented.

In each category you will find overviews of the lessons complete with one or more audio clips. These are previews of the complete lessons that are available for purchase and download for registered users. Have a look and a listen to see and hear for yourself.

Registration is free and will give you access to purchase credits to be used to download the full lessons in both audio MP3 format as well as the accompanying transcript as a text document very well explained.

Each lesson has two, separate files:

an MP3 audio file - 2 Credits required

a text document containing a transcript (1 Credit=1\$)

of the audio file - 3 Credits required

Although you can download either one, it is encouraged to download both and use them together in order to obtain the full benefit of the lesson. This is why the Credit Plans are in increments of 5 Credits.

If you believe that in the future you would like to download more than a few lessons, you can save time and money by purchasing a larger Credit Plan and just download the ones you want at the moment. Your Credit Balance will be updated and the remaining Credits will be available whenever you like. They will never expire.

New lessons are added frequently, so bookmark us or subscribe to our RSS feed with your favourite reader to find out when new lessons are available.
